### HOW TO LEARN VOCABULARY

1. Make a memory sheet by folding a piece of paper in half vertically. On the front flap, write the Spanish word. On the inside, write the English translation and quiz yourself by lifting the flap.
2. Write hard words (and their English translations) five times each. Make sure to spell them correctly!
3. Make a set of flashcards so you can study on the go.
4. Tape your vocabulary list in a place where you will see it often. You can try putting it on your desk at home or even on your bathroom mirror so you see it in the morning when you brush your teeth.
5. Use an online study tool like Quizlet to make digital flashcards and play memory games. There's even an app you can use when you don't have access to a computer. Ask your parents first!
